SUMMARY

- Front-End Developer with strong experience in building modern, responsive, and high-performance web applications using React and TypeScript. Skilled in designing reusable component-based architectures and integrating RESTful APIs using Axios and modern state management tools.
- Experienced in developing and customizing e-commerce platforms on Salla and Zid using Twig templating, with a strong focus on performance, scalability, and user experience.
- Passionate about writing clean, maintainable code and building fast, accessible, and user-friendly interfaces.

SKILLS

Front-End Development

HTML, CSS, JavaScript (ES6+), React.js, TypeScript, Bootstrap, Tailwind CSS, SASS/SCSS, Twig

State Management & Data Handling

Zustand, React Query, Axios, RESTful APIs, JSON, Async/Await, Error Handling

UI / UX & Performance

Responsive Web Design, Cross-Browser Compatibility, Performance Optimization, Accessibility, Component-Based Architecture, Clean Code Practices

Libraries & Animations

Swiper.js, GSAP, Animate.css, WOW.js

Version Control

Git, GitHub

E-Commerce Development

Salla & Zid Theme Development, Twig Templating & Customization

EXPERIENCE

08/2024 – Present
Egypt

Front-End Developer

Azraq

- Developing and maintaining responsive web applications using modern front-end technologies including Tailwind, SASS, and JavaScript.
- Working on **Salla , Zid platform** development and customization using **Twig templating language**.
- Integrating RESTful APIs and handling JSON data to enhance application functionality and user experience.
- Utilizing Swiper.js, WOW.js, and Animate.css to build engaging and dynamic user interfaces.
- Collaborating with cross-functional teams using Git and GitHub for version control and project management.

06/2024 – Present
Dakhlia, Egypt

Front-End Developer

EGY TIGERS

- Design and develop responsive web interfaces using HTML, CSS, JavaScript, and React, along with Tailwind CSS, SASS, and Bootstrap.
- Build reusable UI components and implement basic React functionality to enhance interactivity and user experience.
- Apply modern UI/UX principles to ensure clean, user-friendly, and consistent interfaces across the application.
- Collaborate with the team using Git and GitHub for version control and project coordination.

- Ensure cross-browser compatibility and optimize performance across different devices.

PROJECTS

Taskify – Collaborative Task Management Platform

- Built a Kanban-style task management app using React and TypeScript with workspace-based organization and task workflows.
- Implemented JWT authentication, advanced filtering/sorting, and efficient state management using Zustand and React Query, with a responsive and interactive UI.

Apple Web

- Developed a responsive web application using React.js and Tailwind CSS, with smooth and interactive animations powered by GSAP.
- Focused on building an intuitive user interface, dynamic user interactions, and ensuring cross-browser compatibility.

Zenvy – E-commerce Platform

- Built a scalable e-commerce web application using React and TypeScript, featuring full customer workflows (product browsing, filtering, cart, checkout, and order tracking) alongside an admin dashboard for managing products, orders, and customers.
- Implemented JWT authentication with role-based access control, optimized performance using lazy loading and debounced search, and structured the app with Redux Toolkit and TanStack Query for maintainable state and data management.

FlowState – Personal Productivity Web App

- Developed a productivity web application that integrates task management, habit tracking, and Pomodoro-based focus sessions into a unified dashboard. Implemented drag-and-drop task organization, streak-based habit tracking, and interactive analytics for monitoring user performance. Focused on scalable state management and responsive UI using React, TypeScript, Zustand, and Tailwind CSS.

Shopix – Fashion E-Commerce

- Developed a modern, responsive e-commerce storefront using React, TypeScript, and Vite, featuring dynamic cart management and reusable component-based architecture.
- Delivered a polished UI with Tailwind CSS and Radix-based components, focusing on performance, smooth animations, and scalable frontend structure.

Modern Interactive Portfolio

- Developed a fully responsive portfolio SPA using React, TypeScript, and Vite with a focus on scalable component architecture and advanced UI interactions.
- Delivered smooth animations, dynamic sections, and reusable design systems using Tailwind CSS and Radix-based components.

EDUCATION

2022 – 2026

Mansoura, Egypt

Bachelor's Degree in Computer Science

Mansoura University

Studied core areas of Computer Science including software engineering, data structures and algorithms, operating systems, computer networks, databases, and web development. Built a strong foundation in programming principles, problem-solving, and modern development practices, with hands-on experience across multiple programming languages and technologies.
